Welcome to The Country Barn Yard

Come visit one of our displays. Stroll around our display lot and step inside the storage sheds. Let us help you decide on the storage building that fits your needs, compliments your landscape and adds value to your home. We have a variety of designs that are attractive, functional, and built to last a lifetime. A storage shed is more than a good investment, saving you the monthly payment to the storage rental. It also adds value to your property, and adds convenient storage for your larger items. Tired of garage clutter? A storage shed can help you free up that space. A shed makes the perfect spot to protect your lawn mower, snow blower, yard tools, and much more. We also offer cute playhouses for the little people in your life. Give them a house to make into their own. Check out the chicken houses, perfect for your flock large or small. All products can be customized for your individual needs and tastes. We construct our buildings locally, using quality materials. We strive for your satisfaction as our customer, so that you will recommend us to your friends and family. Stop at one of our display lots where you can get a firsthand look and decide for yourself . . . Call to find one close to you.

CLASSIC RANCH

Classic Ranch Sheds are a practical solution for many needs ranging from storage to studio. Customize your shed with single or double doors, Roll up garage door, or SmartSide lap siding. Our **RANCH 35** is another option. Its steeper 8/12 roof gives more head room and good looks. Large or small, the ranch style is a popular choice.

SITE PREPARATION

When purchasing a shed you will want to consider a good foundation. We recommend a gravel pad. This will give your shed the stability it needs to reduce stress on the structure and keep doors and windows working properly.

The most important part of a shed pad is it must be of adequate size and level!! Sheds placed on blocks or poorly prepared pads may cause stress on the structure and difficulty for the user.

We recommend site preparation through the services of our subcontractor Bear's Shed Services. His experience with building sheds and installing pads make his business a good choice for pad installation.

Call Leland Bear at 507.208.9708 with any questions about site preparation.

You may choose to perform this work yourself using the following guidelines;

- If needed remove 3"-4" of topsoil in an area 1' larger on all sides of the structure. (A size 10x12 shed needs a size 12'x14' pad.)
- Level and compact 4"-6" of class 5 crushed limestone to create a level stone pad for the structure to rest on. *Leveling can be done using a laser, line level or a 4' level placed on a long straight edge. Again making sure the pad is level and compacted properly.*
